**EDUCATIONAL PROGRAM
"Veterinary welfare of animals"**
(name of the program)

Area Code and Classification: 8D09 Veterinary Medicine

Code and classification of training areas: 8D091 - "Veterinary Medicine"

Code in the International Standard Classification of Education: 8D 0841

Qualification: Doctor of Philosophy (PhD) in the educational program "Veterinary welfare of animals"

Training term: 3 years, scientific and pedagogical

Form of study: full-time

Nur-Sultan, 2019

The author's team:

1. Abdrahmanov Sarsenbai Kadyrovich – Doctor of Veterinary Sciences, Professor, Dean of the Faculty of Veterinary Medicine and Animal Husbandry Technology, Saken Seifullin Kazakh Agro Technical Research University
2. Abdrahmanov Talgat Zhunusovich – Doctor of Veterinary Sciences, Professor, Head of the Department of Veterinary Medicine, Faculty of Veterinary Medicine and Animal Husbandry Technology, Saken Seifullin Kazakh Agro Technical Research University
3. Maykanov Baltabay Sadepovich – Doctor of Biological Sciences, Professor of the Department of Veterinary Sanitation, Faculty of Veterinary Medicine and Animal Husbandry Technology, Saken Seifullin Kazakh Agro Technical Research University
4. Dzhakupov Isatay Tusupovich – Doctor of Veterinary Sciences, Professor of the Department of Veterinary Medicine, Faculty of Veterinary Medicine and Animal Husbandry Technology, Saken Seifullin Kazakh Agro Technical Research University
5. Terlibayev Askar Aidarkhanovich – Candidate of Veterinary Sciences, Associate Professor of the Department of Veterinary Medicine, Faculty of Veterinary Medicine and Animal Husbandry Technology, Saken Seifullin Kazakh Agro Technical Research University
6. Inirbaev Asylkhan Kabievich – Candidate of Veterinary Sciences, Senior Lecturer, Acting Head of the Department of Veterinary Sanitation, Faculty of Veterinary Medicine and Animal Husbandry Technology, Saken Seifullin Kazakh Agro Technical Research University

The team of authors was approved by the order of JSC "Saken Seifullin Kazakh Agro Technical Research University"

1 Passport of the educational program (EP)

1.1 Goals and objectives of the modular educational program

The aim of the EP is to train highly specialized personnel to carry out managerial, research and pedagogical activities aimed at ensuring the welfare and protection of animal and human health, in the fields of veterinary medicine, agriculture and biology.

The content of the EP provides knowledge and practical skills in the implementation of conceptual studies to substantiate animal disease control activities in the conditions of the Customs Union and the World Trade Organization, as well as in accordance with the requirements and recommendations of international organizations (World Organization for Animal Health, Food and Agriculture Organization, UN World Health Organization).

The main tasks of the EP in the specialty 8D09 - "Veterinary" are:

- deepening theoretical and practical knowledge in the veterinary branches, due to the needs of the state and the agricultural market, the activities of scientific and educational institutions;

- training of specialists with a high level of professional culture and citizenship who are able to formulate and solve modern scientific and practical problems in the structures of veterinary medicine, education and business;

- formation of skills and skills among doctoral students that contribute to integration into the world scientific and educational community;

- provide an individual educational trajectory of training in accordance with the specialization chosen by the doctoral student.

- The OP is composed taking into account the current personnel needs of potential employees from the field of education and the agricultural sector, knowledge-intensive enterprises, specialized laboratories, as well as research institutions of agricultural and biological profiles.

1.2 Learning outcomes

LO 1. Use a systematic approach when conducting scientific research, analyze the results obtained and reflect them when writing academic texts, taking into account scientific knowledge.

LO 2. Demonstrate the concept of a legal and anti-corruption culture, integrate the importance of the principles and culture of academic integrity for the formation of a competent personality with high thinking potential.

LO 3. To interpret the role of the immune system in the emergence and spread of pathological processes in the body of animals, to explain the basics of immunology.

LO 4. To develop skills in working with pathogens of particularly dangerous animal diseases, conducting laboratory research in diagnostic and research work to ensure the safety and biological protection of people and animals.

LO 5. Demonstrate methods of molecular biotechnology of animal breeding, principles of embryoengineering, embryoculture, embryotransplantation.

LO 6. Use modern methods and methods of scientific research in veterinary medicine, analyze and interpret the results obtained.

LO 7. To distinguish between the indicators of the immune system in normal and immunopathological conditions, to represent the role of the immune system in maintaining the body's homeostasis and regulating the immunological response at the molecular and cellular level.

LO 8. To use methods of mathematical modeling of epidemiological situations in diseases, to predict and assess the risk of possible occurrence of infectious pathology.

LO 9. To identify the correlation between the etiology and pathogenesis of diseases with the subsequent establishment of effective methods of diagnosis and treatment.

LO 10. Apply innovative methods of diagnosis and treatment with subsequent analysis and interpretation of the results.

2 General characteristics of the educational program (relevance, features, competitive advantages, uniqueness, stakeholders, etc.)

The EP in the specialty 8D09 - "Veterinary" was developed by the National Qualification Framework and professional standards, agreed with the Dublin Descriptors and the European Qualification Framework, based on the State Compulsory Standard for Higher Education, approved by order of the Minister of Education and Science of October 31, 2018 (No. 604) and the standard curriculum of the specialty 8D09 - "Veterinary." The OP is designed based on a modular system for studying disciplines and contains 5 modules that form general cultural, special language, and professional competencies.

The number of loans is 180 credits, of which: theoretical training - is 53 credits, practical training (all types of practices) - is 115 credits, and final certification - is 12 credits.

The relevance of the EP corresponds to the main areas of international research in specific branches of veterinary sciences, they form the skills of doctoral students in conducting scientific work at the modern level and integration into the world scientific community.

The peculiarity of the EP is that it ensures the need of the labor market for scientific and practical personnel of the veterinary profile, which has special competencies in the field of epidemiology, modeling and molecular biological research of contagious diseases, biotechnology of reproduction of populations of farm animals, management of food safety of animal products in the context of globalization of the world economy.

The competitive advantages of the developed EP are that it is aimed at conducting comprehensive research by doctoral students and implementing interdisciplinary scientific projects that solve specific significant regional problems of Kazakhstan in the fields of agriculture, health care, and veterinary medicine.

The uniqueness of the program lies in the fact that the process of its implementation is carried out within the framework of international, republican, and grant research projects, as well as direct contracts with business entities, which allow doctoral students to use the material and technical platforms and resources of the university, other scientific institutions and enterprises to achieve innovative results that meet international standards.

The stakeholders of the EP are official veterinary services, laboratories of the regional, and republican significance of Kazakhstan, NPP "Atameken," agro-industrial enterprises, and leading research institutes of Kazakhstan of veterinary and biological profile.

3 Competence model (portrait) graduate

3.1 Areas of professional activity:

- carrying out research activities in scientific and design organizations of the veterinary, biological and agricultural direction;
- pedagogical activities in organizations of secondary, higher and additional professional agrarian, technological and biological education;
- participation in the management of the state, and interstate veterinary service, as well as the control and supervision of dangerous contagious and non-contagious animal diseases;
- organization of production and research business structures.

3.2 Types of professional activity

Ph.D. 8D09 - "Veterinary" can perform the following types of professional activities:

- production and management;
- organizational and technological;
- research;
- design;
- pedagogical.

Specific activities are determined by the content of the educational program.

3.3 General education competencies

EP Doctor of Philosophy (PhD) specialty 8D09 - "Veterinary"

- understanding of evolution, basic concepts of world and domestic achievements of veterinary, agricultural and biological sciences and practice;
- compliance with the principles of scientific ethics;
- knowledge of international and domestic veterinary legislative and regulatory documents; methodologies of scientific cognition.

3.4 Basic competencies

The following are defined as basic values:

- carrying out professional and comprehensive analysis of problems in the relevant area;
- ability of interpersonal communication and management of human resources, university training of specialists;
- have skills of patent search; protection of intellectual rights; analysis of scientific theories and ideas;
- have an oratory and experience in public speaking at scientific forums
- knowledge in the field of economic policy of the state, management of enterprises and economic entities of an agricultural profile.
- use of a foreign language for scientific communication and international cooperation.

3.5 Professional competencies

- organization of scientific and pedagogical activities in the context of globalization, rapid renewal and growth of information flows;
- management of theoretical, experimental and applied scientific research;
- knowledge of scientific methodology, modern software products for processing results;
- competent examination of scientific projects and research;
- knowledge of pedagogical methodologies of higher and secondary special education;
- ensuring constant professional growth.

4 Bases of passing professional practices

Doctor of Philosophy (PhD) of the specialty 8D09 - "Veterinary Medicine" can undergo professional practices in the following institutions:

- in institutions of the state veterinary service, in veterinary posts at the border and transport, in checkpoints;
- at enterprises for the manufacture and control of biological preparations and biologically active substances;
- in research institutes, in public and private veterinary organizations;
- enterprises, organizations leading training and retraining of veterinary specialists;
- research and design organizations in the field of veterinary medicine.

5 The structure of the educational program of the master's degree in the scientific and pedagogical direction

№	Description of cycles of disciplines and types of activities	Total labor intensity

Matrix of achievability of the generated learning outcomes in the educational program using academic disciplines

№	Name of the discipline	Brief description of the discipline (30-50 words)	Number of credits	Generated learning outcomes (codes)								
				PO1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9
The cycle of general education disciplines												
1	Academic Writing	Studies the techniques of writing academic texts, abstracting, compiling and processing research results, developing a presentation of his own project, the basics of bibliography: references, descriptions and editing of academic text	5									
2	Innovative methods of animal reproduction biotechnology	Examines methods of molecular biotechnology of animal breeding; principles of embryoculture, embryotransplantation, forms skills for creating a cryobank of gametes and embryos, describes a vital method for studying reproductive cells of animals.	5	V	V	V	V	V	V	V		
3	Veterinary immunology	Examines the functioning of the immune system in normal and immunopathological conditions; the role of the immune system in maintaining the body's homeostasis, the development of the mechanism of immunological recognition of antigens and the regulation of the immunological response at the molecular and cellular level.	5									
4	Methods of scientific research	Forms the skills of setting a scientific problem based on the description of contradictions between the available knowledge about the object of research and the knowledge necessary for the practical solution of the problem. Studies the principles of developing a scientific research plan and methods of theoretical, experimental research and registration of scientific results.	5	V	V	V	V	V	V	V		
5	Biological safety in especially dangerous animal diseases	Examines the epizootic situation of particularly dangerous infectious diseases in the world and the Republic of Kazakhstan. Describes biological safety measures for particularly dangerous animal diseases.	5									
6	Modeling of epidemiological processes in infectious animal	ies methods of mathematical modeling of epidemiological processes in diseases of non-infectious etiology, explains the basic principles of forecasting and assessing the risk of possible spread of infectious pathology in							V	V		

	diseases	certain territories.												
7	The main problems of diagnosis and treatment of non-communicable animal diseases.	Describes the main etiopathogenetic links in the development of diseases using modern methods of diagnosis and treatment of animal diseases with non-infectious etiology.							V
