

Dear innovators and inventors!

We invite you to participate in the Innovation Competition, the "Online Expo-2017" portal.

The "Online Expo 2017" project is a real opportunity to become a part of the global innovation breakthrough, to share this historic moment with the country, to create a "theory", a "product" of the energy of the future. This platform will serve as the Bank of innovative ideas for investors and development institutions of Kazakhstan.

The competition is directed on preliminary selection of innovations and projects for the EXPO-2017 exhibition. It will be annually carried out prior to the exhibition and according to its results Mini-Expo exhibitions are planned to be held within the framework of the Astana Economic Forum in 2015, 2016 and 2017.

Nominations of the competition cover the following five subjects:

- ✚ renewable and alternative energy sources,
- ✚ clean technologies in the traditional energy sector (accumulation and transportation of energy, coal, hydrocarbons, coal mine methane, associated gases of oil production, etc.);
- ✚ energy efficiency and resource-saving;
- ✚ "green" chemistry and new composite ecological materials, recycling of waste (solid, liquid, air) and CO₂;
- ✚ organic agriculture, adapted to climate change, promoting the absorption of CO₂ and methane emission abatement, and sustainable water supply.

There are all conditions for legal entities and individuals for filing applications on the "Online Expo-2017" platform. Thanks to the "Online Expo-2017" project you will be able to take part in two competitions:

1 competition - National Level, the submission of applications is already underway and results will be announced in March 2015. The winners will have the opportunity to take part in the Mini-Expo 2015 in the framework of the VIII Astana Economic Forum;

2 Competition - International level, the submission of applications will begin in January 2015 and will continue until the middle of 2016. The winners of the international competition "Online EXPO-2017" will have an opportunity to participate in the EXPO-2017 exhibition.

The distinctive advantage of the project is that all the applications that are selected by the moderators and experts will be nominated online.

Integration of the Online EXPO-2017 project with G-Global information communication platform will draw attention of millions of experts from 170 countries of the world to the projects of competitors.

The prize fund is not formed yet; the main form of incentive is participation in the Expo-2017, mini-Expo, public awareness and branding and promotion to the national and international programs, recommendations for investors, making contacts with potential sponsors and others.

For more information on the conditions of the competition can be obtained at the office of commercialization S.Seifullin KazATU, room 614 or go to <http://online-expo2017.com>.
