Protocol №1 dated 07.09.2014

Contents

№	Number and name of the module	Name of discipline	Page
Explanatory note			6
General education			
1	Module 1: Social and political disciplines	Religious	7
Basic disciplines for educational program Protective afforestation			
2	Module 5 – Botanical	Forest botany	7
3		Dendrology	8
4	Module 6 - Chemical and Biological	Chemistry	8
5		Forest Zoology and hunting	8
6		Vegetable physiology	9
7	Module 7 – Soil	Pedology	9
8	Module 8 – Geodesy	Engineering surveying	9
9	Module 9 - The mechanization of forest operations	Mechanization of forest work	10
10		Labor protection	10
11	Module 10 – Forestry	Wood and Forestry resource studying	11
12		Meteorology	11
13		Recreational forestry	11
14	Module 14 - Forest inventory, merchandising, technology of wood processing	Forest Inventory	12
15		Technology of wood processing	12
16		Forest commodity	13
17	Module 15 - Protection of forests	Forest protection	13
18		Forest fire science	13
Basic disciplines for educational programs Landscaping and gardening			
19	Module 5 – Botanical	History of the development of landscape art	14

20		Forest botany	14
21		Dendrology	14
22	Module 6 – Saline	Vegetable physiology	15
23	Module 7 – Soil	Pedology	15
24	Module 8 – Geodesy	Engineering surveying	16
25	Module 9 - The mechanization of forest operations	Mechanization of forest work	16
26		Labor protection	16
27	Module 10 – Forestry	Wood and Forestry resource studying	17
28		Meteorology	17
29		Recreational forestry	18
30	Module 14 - Forest inventory, merchandising	Forest Inventory	18
31		Forest commodity	18
32	Module 15 - Forest protection and breeding of forest crops	Selection of forest crops	19
33		Forest protection	19
34		Forest fire science	19
Profiling disciplines for the educational program Protective afforestation			
35	Module 16 - Silviculture and breeding of forest crops	Selection of forest crops	20
36	Module 17 - Decorative Dendrology and gardening of settlements	Decorative dendrology	20
37		Greening populated places	21
38	Module 18 - Forest growing	Plantation forest growing	21
39		Forest melioration	22
40	Module 19 - Forest administration	Specially protected areas	22
41	Module 20 - Methods of accounting of forest resources and forest management	Geographic information systems and remote sensing of forests	23
42		Forest management	23
43		Forest administration	23
Profiling discip for the educational program Landscaping and gardening			

44	Module 16 - Decorative Dendrology and floriculture	Decorative dendrology	24
45		Floriculture	24
46		Flower arrangements and floristry	24
	Module 17 - Forest growing	Plantation forest growing	25
49	Module 18 - Greening and Landscape Construction	Greening populated places	25
50		Landscape design	26
51		Landscape Construction	26
52	Module 19 – Forest control	Specially protected areas	26
53	Module 20 - Methods of accounting of forest resources and forest management	Geographic information systems and remote sensing of forests	27
54		Forest management	27
55		Forest administration	28

Explanatory note

Dear students! When the credit system of training a mandatory element of educational and methodical complex specialty is the catalog of elective courses (CEC), which is a list of subjects included in the component of choice. In accordance with the SES RK increased volume of loans allocated to elective subjects, and therefore increases the value of CEC students to select their educational trajectory.

Catalogue of elective courses a student is used in the preparation of the individual curriculum developed personally by the student under the guidance of faculty advisor, taking into account the individual abilities of the student, the prospects for its growth, the labor market needs and production. To form their educational trajectory, the student should master all the disciplines necessary components are in accordance with the model curricula, and also choose to study from the catalog one of the proposed educational programs, and in accordance with the selected program must choose elective subjects. In the catalog of discipline combined into modules. The catalog offers the discipline that allow students the opportunity to learn two educational programs: **Landscaping and gardening and Protective afforestation.**

Educational program "**Landscaping and gardening**" was created based on the request of employers in connection with the increased demand for specialists, landscapers, able to organize and carry out work on the design, construction and operation of landscape architecture. The educational program will provide deep theoretical knowledge and practical skills to implement the greening of urban areas, the selection of the basic range of plants, planting and caring for them, the development of ideas of structural-functional organization of the objects of landscape gardening, renovation, green spaces and parks.

Educational program "**Protective afforestation**" was created based on the request of employers in connection with the increased demand for specialists who can develop and implement projects of forest reclamation, monitoring forest management and silvicultural work work to care for the forest, reforestation and protective afforestation. The educational program will provide deep theoretical knowledge and practical skills in accounting and protection of forest resources, forest management, the establishment of forest plantations and growing seedlings, planting of settlements, development of projects of forest nurseries, methods of planting, protection and greening afforestation, forest reclamation technology.
