

The Institute of Business and Digital Technologies organized a holiday for its students during the holy month of Ramadan.

At the Institute of Business and Digital Technologies, the educational process is not limited to professional training but also places special emphasis on the upbringing and spiritual development of students. The institute's staff considers the development of values such as moral education of youth, mutual assistance, support, and care to be among its key principles.

On this occasion, on March 5, 2026, the team of the Institute of Business and Digital Technologies organized an iftar for the students of the institute.

Organizing an iftar for students fasting during Ramadan was a noble initiative aimed at strengthening friendship and unity among students, as well as developing qualities such as mercy and compassion.

This event strengthened the spiritual bond between students and teachers and helped instill kindness, mutual respect, and support in young people.

Similar events, which have significant educational value, will be held at the institute in the future. Only where education and upbringing go hand in hand can we develop qualified, intelligent, and responsible citizens of the future.
